The International Code Council (ICC) provides the following Building Valuation Data Table – February 2022, which represents “average” construction costs per square foot for most buildings. This table is used to determine permit fees, for **building permit applications submitted on or after July 1, 2022**.

The following building valuation data represents average valuations for most buildings. These average costs are based on typical construction methods for each occupancy group and type of construction. The average costs include structural, electrical, plumbing, mechanical, interior finish and normal site preparation.

The square footage of a dwelling, addition, or garage shall be determined from outside exterior wall to outside exterior wall for each level. The square footage of carports, covered porches or patios and decks shall be calculated separately at fifty (50) percent of the value of private garages.

The data is a national average and does not take into account any regional cost differences.

For additional information, visit ICC at <https://www.iccsafe.org>.
